One Central Platform

■ **Integrate multiple systems**

Bring together data from different systems into a simple secure view with the ability to drill down to specific details

■ **Automate processes**

Optimise business workflow and improve data integrity by reducing manual tasks, human error and administration costs

■ **Secure data control**

Control who sees what data in your organisation. Specify user roles for departments and management levels with forensic audit logs.

■ **Access to live information**

Real time access to factual data - central place of truth

■ **Make better decisions**

Increase confidence across all teams, reduce frustrations, resolve issues faster, improve customer service and portray best practice business principles.

Mobile First

■ **Fast secure access using smartphone**

■ **Simple user friendly interface**

■ **Access on any devices, operating system, web browser**

Give your team secure fast access to reliable live data

- Products - Codes, brands, descriptions, images, videos, specifications, manuals & files.
- Whole goods / machinery - Serial #, reg, hours, details, images, status - 'for sale' / 'sold'.
- Stock availability - Quantities in warehouse, depots, bin / area / location.
- Supplier / distributor levels - Days to delivery - 'Next day' / '3 days' / '7 days'.
- Pricing - Retail (B2C), trade (B2B), dealers. Only registered / approved users to view set pricing. Apply markup to cost pricing, RRP, to display relevant sales price.
- Marketing campaigns - Set special offers, timed campaigns - start end date
- Bulk discounts applied to product category, sub category & brand combinations.
- Customers - Contact, CRM, Retail/B2B, price contracts, quantity breaks. trade discounts.
- Orders - Quotes, orders, fast repeat ordering, sales history, delivery tracking.
- After sales - Warranties, servicing, maintenance, annual licence, parts

PRODUCTS

Receive live product information from suppliers
Display directly on your ecommerce website

INVENTORY

Receive live stock updates from suppliers

↻ Dotser Process

Learn

Gathering as much information at the beginning helps us to understand your business goals. We will ask questions to learn more about your business.

Design

With your input, we will devise a visual style and structure for your online business

Develop

Create a blank shell system on our secure hosting platform and implement the agreed design and custom elements

Test & Train

Test system elements, provide online access and train appointed users in the CMS

Launch

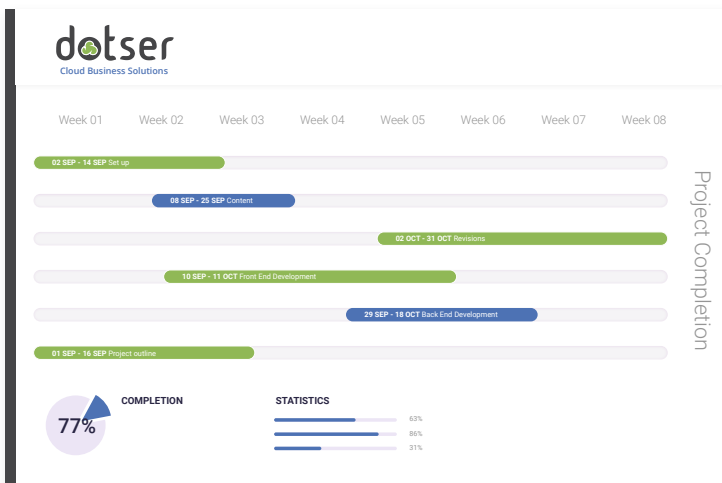

Complete launch procedure to ensure smooth system implementation with scheduled post-deployment.

Project Management

Efficient project management is crucial to completing the goals and objectives of the project and to determine when the various project components are to be completed.

With over 20 years experience, Dotser have developed a real understanding of our customer needs and have earned a proven track record delivering results on time.

The diverse team at Dotser consists of individuals with different backgrounds and experience fostering creativity and excellent problem-solving capabilities. Using the best project management software enable Dotser to streamline project workflows, enhance collaboration and productivity.

We use Jira Project Management Software to ensure your project is delivered as agreed.

Content Management System (CMS)

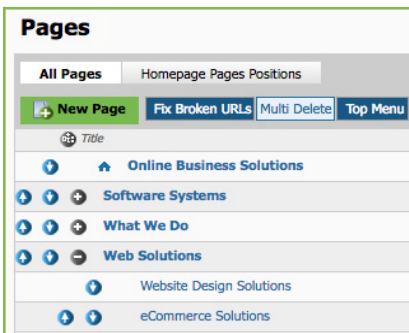

The Dotser Content Management System is designed to simplify uploading and editing your website content.

Dotser CMS allows you to:

- Control your website's structure (pages & subpages)
- Enter/edit content (text & images)
- Receive help and support from the Dotser helpdesk

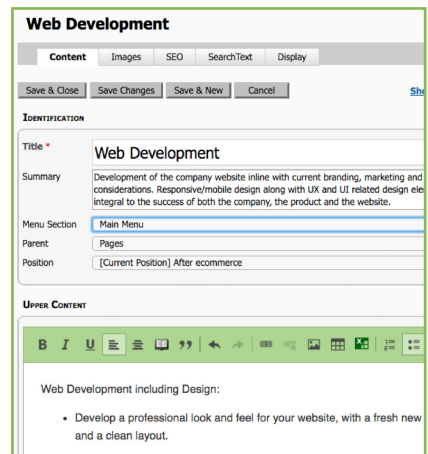

Page Structure

- User-friendly page-structuring
- Add/remove/order pages & subpages
- Hide/block pages

Web Pages

Easily input & update text.

Payment Gateways

Multiple Payment Options

Allow customers choose how they want to pay - secure shopping cart with multi payment gateways.

Customers can pay for products and services using a secure shopping cart system and reputable payment gateways from leading payment providers.

stripe

Dotser work with Stripe software in order to accept payments and manage businesses online.

Whether you're looking to bill customers on a recurring basis, set up a marketplace, or simply accept payments, Stripe is the leading fully integrated, global platform that can support online payments.

Secure Cloud Hosting

Secure & Server Databases

Cloud hosting and storage is a critical component of an effective online business and digital strategy. Dotser's experience in providing a secure and resilient cloud infrastructure to host your business solution ensures your system is always online.

Dotser uses a complete range of cloud storage services to support both application and archival compliance requirements and our partnership with world leaders in cloud technologies ensures we offer reliable, scalable, and secure solutions.

Back up Policy

Dotser has the ability to recover, restore and retrieve data that is lost/damaged/compromised to meet regulatory backup compliance requirements.

Cloud Partners

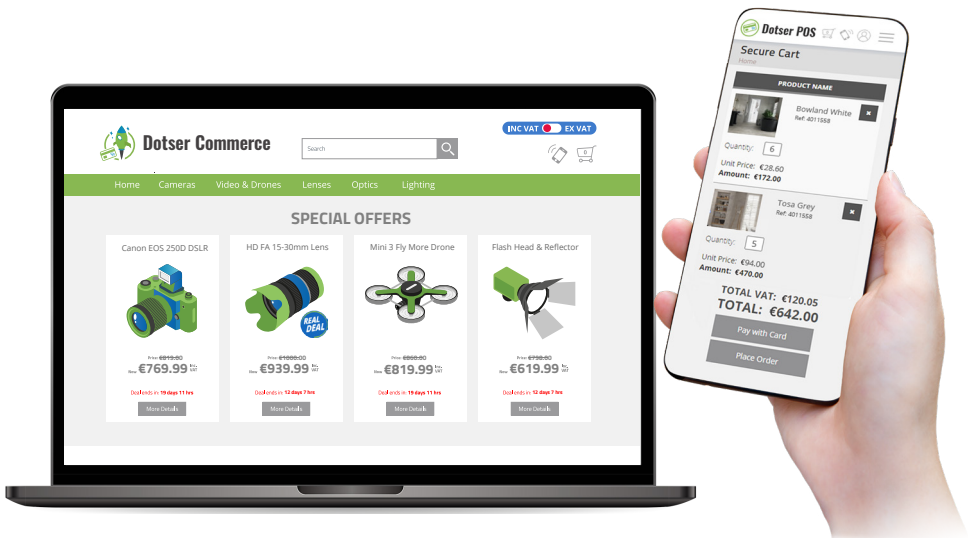

Layout & Design

The creative team at Dotser are here to assist you in developing and designing your website.

The Dotser team will:

- Create the website layout and design in line with company branding
- Implement your brand font and colour scheme (*style sheet*)

Brand Identity / Customisation

Logo Customisation Service

As part of our service Dotser will provide you with a number of logo customisations.

Dotser will develop your logo to compliment your website and provide you with a strong brand message, allowing you to promote your business in order to generate sales.

Logo/Brand Refresh

Update of your business logo for use on your website and in your marketing material

Search Engine Optimisation (SEO) Tool

At Dotser we pride ourselves on achieving high organic rankings for our clients on Google, which delivers the best return on your marketing investment.

- Search engine-friendly URL's
- Simple to use module to manage page title, descriptions and keywords
- Proven to deliver results for competitive keywords
- Natural, organic rankings attract more attention

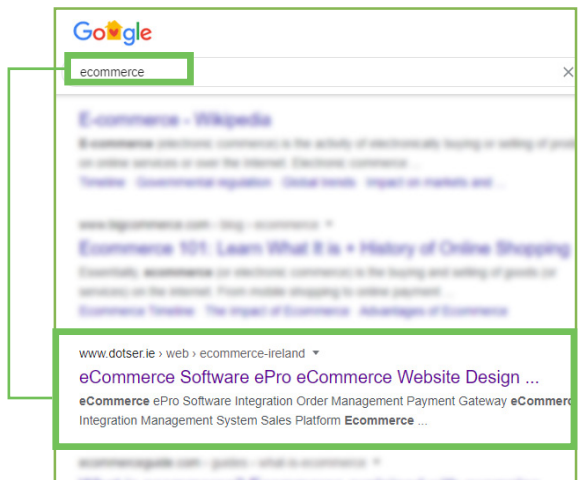

Applying SEO expertise to provide high rankings in organic search results consistently outperforms the return on paid search advertising.

This fact alone is why Dotser's SEO expertise can be a valuable weapon in your online arsenal.

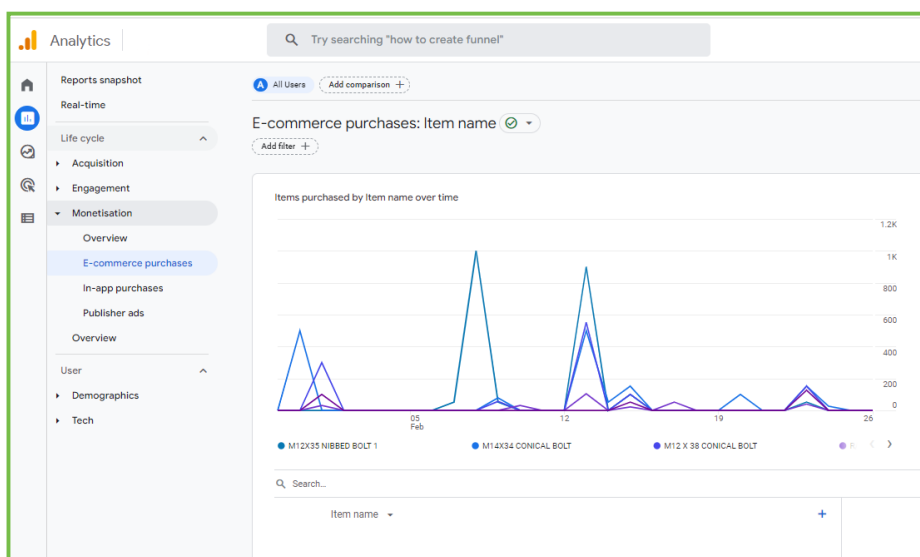

Organic/Natural Search Results

Tools to Compete with International Brands
Paying Large Amounts on Google Adwords

Dotser Agri is integrated with the latest Google Analytics tools (GA4) to give important insights into website user behaviour

E-Commerce purchases data

E-commerce purchases by item name - includes items viewed, items added to the cart, items purchased and revenue

Training & Office Hours Support

Client Testimonial

Dotser developed a comprehensive online resource for Whelan's Garage. Through the Dotser Agri API integrating with IBCOS, product information is automatically updated. This ensures an engaging experience for site visitors as well as improved shipping processes.

This solution coupled with the use of the Dotser Agri Content Management System (CMS), has provided for significant SEO improvements, resulting in increased sales of Massey Ferguson merchandise, greater brand awareness and more sales enquiries based on product code searches.

AUTOMATE, INTEGRATE and SCALE are Dotser's three descriptive words for their business offering, and that is exactly what the Dotser's software and integration solution enabled us to do.

We first approached Dotser looking for an ecommerce and website management platform, and then a solution to integrate with our IBCOS dealer management system.

Dotser's systems and software has enabled us to automate our stock updates, reduce costs, and scale the business. We find Dotser very approachable, skilled and solution-orientated, always providing a solution for any concern we have.

I have no hesitation in recommending Dotser and their Dotser Agri platform to any agri dealer out there.

Kevin Whelan
Owner, Whelan's Garage

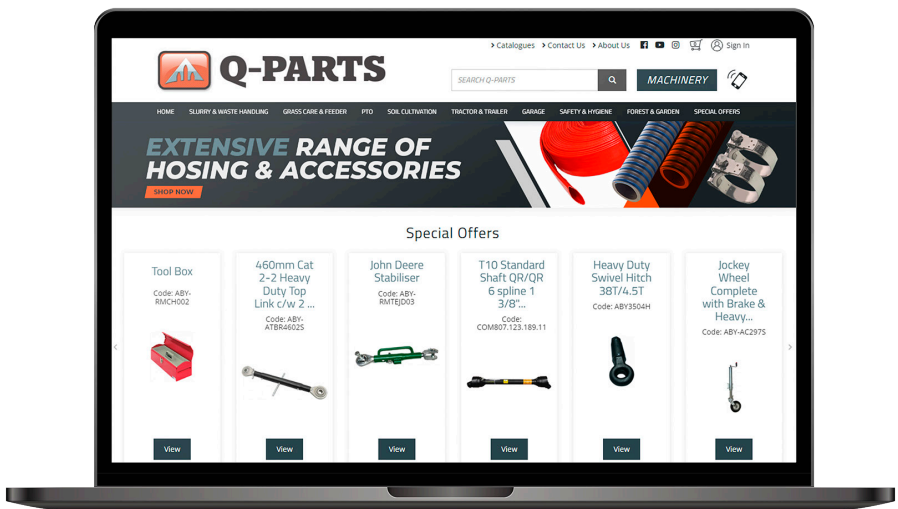

Client Testimonial

Q-PARTS

Leading supplier of wearing and fast-moving parts for the agricultural machinery sector around the world choose Dotser Agri.

System is integrated directly with Abbey's ERP system (M1 from ECI solutions). Enabling registered and approved customers to view live product pricing and stock information, allowing them place orders direct from a simple-to-use mobile responsive front-end.

"Abbey Machinery engaged with Dotser to provide an eCommerce solution; in particular, a webshop for our QParts division to our customer base. The webshop had to integrate with our ERP system — m1 by eci.

Dotser successfully delivered the brief which is now our QParts product - www.abbeyqparts.com

The end result is an easy-to-use platform, delivering sales, with the required information for business analysis.

We've been using the system for two years now (since September 2020), and with the very positive feedback both from our customers and staff alike; Abbey Machinery are very happy with the finished product and continuing service."

Cormac Cavanagh
Supply Chain Manager

Integrated with

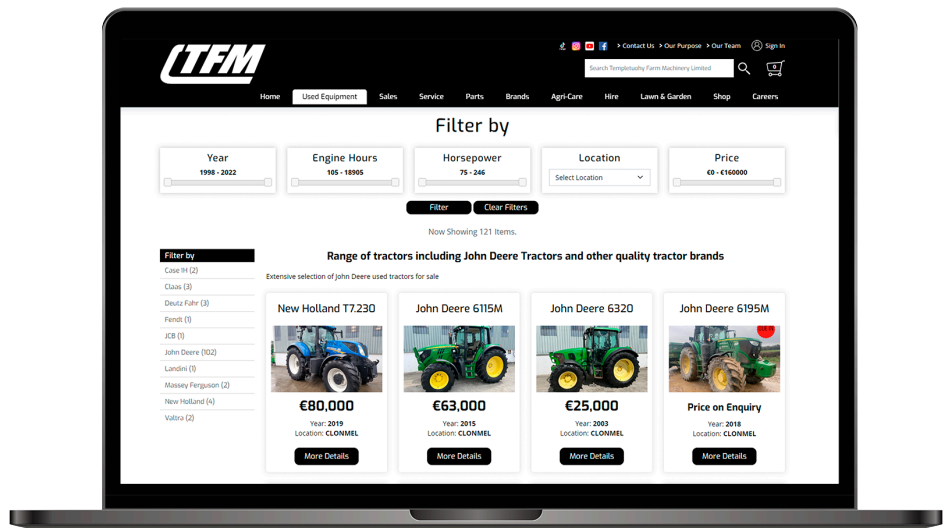

M1[®]

TEMPLETUOHY FARM MACHINERY LTD.

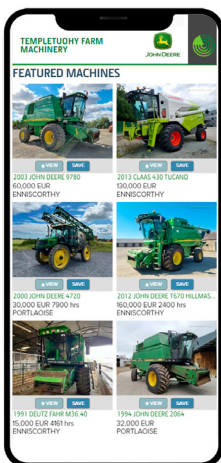

Ireland's largest John Deere dealer Templetouhy Farm Machinery (TFM) selected Dotser Agri's e-commerce platform for an integration solution with John Deere's Machine Finder.

TFM engaged Dotser seeking a new look online interface with more control over product information, enhanced visibility, improved functionality (including greater eCommerce functionalities) and greater usability (UX) for the user.

The new integration solution with the John Deere MachineFinder platform which saves the TFM sales team significant time when publishing machine stock listings online while also giving them enhanced control over how product images and information are displayed. Being able to highlight the relevant TFM sales person responsible for each machine type or product saves a lot of time by allowing customers get straight to the right person.

Automating the publishing of MachineFinder machinery direct to the Templetuohy Farm Machinery website saves duplication of work saving valuable time, resources and attention. Having the machinery data and listings on the website improves natural search engine ranking on Google, delivering greater online visibility and more potential customers direct to the TFM site.
